***Proven Quality Hardware From
One of the Most Trusted Names in Security***

brinkscommercial.com / 1-866-LOCK-PRO (1-866-562-5776)

About us

High-Quality, True Commercial Hardware

Brinks, one of the most trusted names in security, delivers superior quality commercial door hardware and custom ordering options for professionals. We offer a breadth of door closers, Grade 2 levers & knobs, Grade 1 deadbolts and accessories that can be found in areas such as office buildings, small businesses, warehouses and more.

At Brinks we take commercial hardware seriously. Our team of engineers apply their technical fortitude to develop products that exceed customer and industry expectations. Our industry experience led to innovative breakthroughs like our patented Universal Mounting Plate, which provides quick and easy door closer replacement. This allows our customers to save time and money while providing them peace of mind knowing their facilities are in good hands.

Above all, we remain focused on our customers and building long-term partnerships. Our Customer Care Team is ready to provide expert knowledge and technical support and we proudly stand behind our products with a competitive warranty.

Brinks Commercial Universal Mounting Plate Fits Most Installations

U.S. Pat. 7,698,796

Brinks Commercial offers a closer for any commercial door, but our patented universal mounting plate is what sets us apart in closer installation. This mounting plate has holes that match the hole patterns of most closers in the market. Replace a broken closer without drilling new holes in an expensive or fire-rated door.

Scan and see why the All-In-One closer is the PRO's choice for retrofit applications.

Locksets

Lever/Knob Functions

Passage

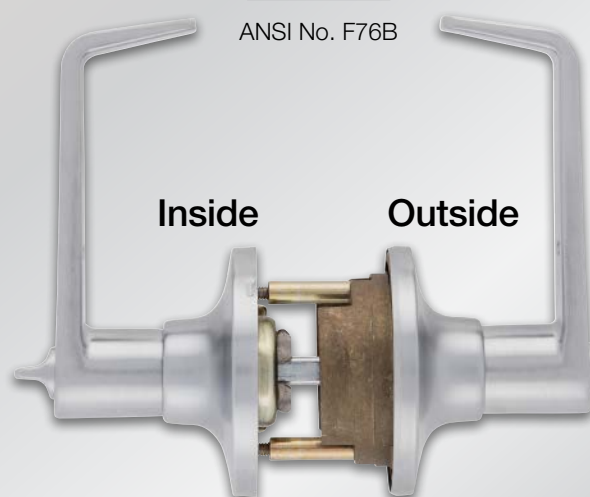

ANSI No. F75

The Passage lever has a latchbolt that is operated by the lever from either side at all times. It does not have a lock function.

Privacy

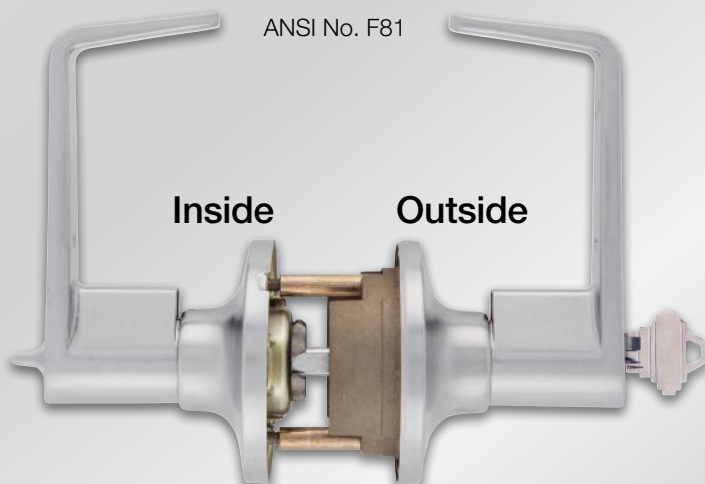

ANSI No. F76B

The Privacy lever has a latchbolt that is operated by the lever from either side, except when the outside lever is locked by the turn button inside. An emergency release on the outside unlocks the locking device. The turn button must be in the unlocked position for the outside or inside lever to operate.

Keyed Entry

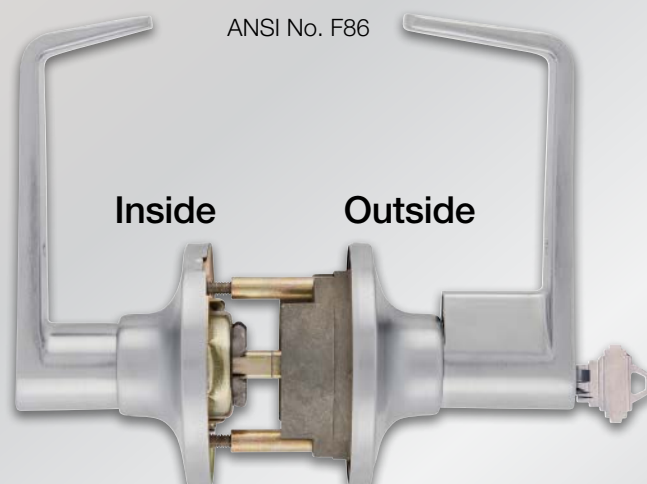

ANSI No. F81

The Keyed Entry lever has a deadlocking latchbolt operated by the lever from either side, except when the outside lever is locked by the turn button inside. Operating the key in the outside lever locks or unlocks the locking device. The turn button must be in the unlocked position for the outside or inside lever to operate.

Keyed Entry – Storeroom

ANSI No. F86

The Keyed Entry – Storeroom lever has a deadlocking latchbolt operated by a key in the outside lever or by rotating the inside lever. The outside lever is always locked.
