Heavy Duty All-In-One Door Closer

**The BEST Choice for Door
Closer Replacement and
Retrofit Applications**

BC4061 – Aluminum Finish

BC4062 – Bronze Finish

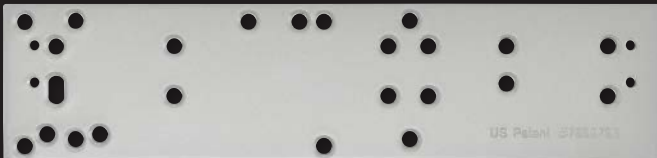

BC4063 – Matte Black Finish

**ADJUSTABLE
SIZE 1-6**

The Heavy-Duty All-In-One Door Closer is Brinks Commercial's most robust and user-friendly door closer. It comes equipped with a patented universal mounting plate that's predrilled to match the hole pattern for nearly any closer in the market. This allows you to easily replace almost any closer without needing to drill new holes in an expensive or fire rated door. Popular closers that can easily be replaced include:

- LCN 4041
- Falcon SC71
- Tell Manufacturing 600 Series
- Corbin-Russwin DC3200 Series

UNIVERSAL MOUNTING PLATE FITS MOST PREDRILLED HOLES

NO NEED TO DRILL NEW HOLES

COMMERCIAL DOOR CLOSER — HEAVY DUTY

**Easily replace these common closers and more
with our universal mounting plate!**

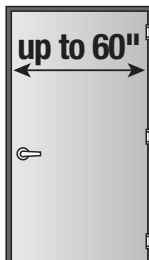

Innovative universal mounting plate fits most installations (U.S. Pat. No. 7,698,796)

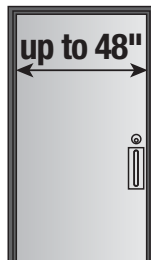

The All-In-One Closer is designed to meet the needs of heavy use and abuse in interior or exterior applications.

- ANSI/BHMA Grade 1
- Non-handed/ reversible
- Adjustable sizing 1-6
- UL Listed/3-hour fire rating
- Aluminum closer body
- ADA compliant
- Adjustable closing, latching and backcheck
- Parallel, standard or top jamb mounting

Built To Fit Your Needs

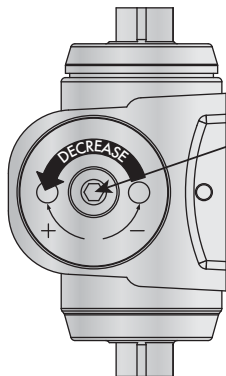

Adjustable Power

The All-In-One Closer is fully adjustable from Size 1-6 to fit whatever size door you have, with a maximum door weight of 250 lbs.

EXTERIOR (and VESTIBULE) DOOR WIDTH –Min. Door Width (24")

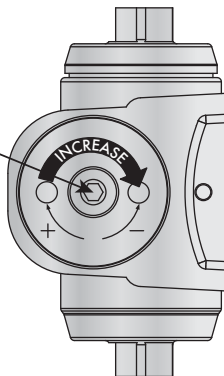

INTERIOR DOOR WIDTH –Min. Door Width (24")

CLOSING POWER ADJUSTMENT NUT

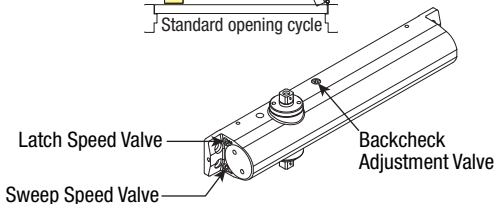

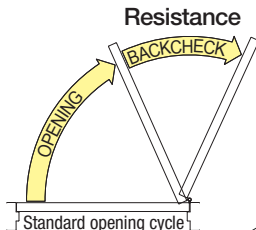

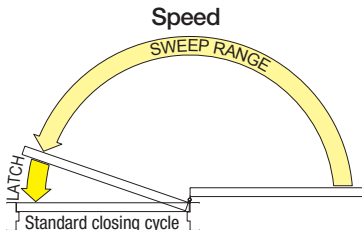

To decrease closing power, turn nut counter-clockwise.

To increase closing power, turn nut clockwise.

Built To Fit Your Needs

Adjustable Latch, Sweep and Backcheck

Installation Methods

STANDARD MOUNT

- Most common installation
- Mounted on pull side of door
- Closer body mounted to top of door and closer arm to face of frame head
- Not recommended when aesthetics are a concern

PARALLEL MOUNT

- Mounted on push side of door
- Closer body mounted to door and closer arm to soffit at frame
- Best method when aesthetics are important
- Best for schools or high-traffic areas to prevent pulling or hanging on closer arm

TOP JAMB MOUNT

- Mounted on push side of door
- Closer body mounted to frame head and arm onto the door
- Recommended when top rail of door is narrow
- More aesthetically pleasing than closer body on the door
