

Ideal for Property Management Projects

Residential & Commercial Door Closers

When tenant safety is top of mind, team up with Universal Hardware for door closer solutions that will keep your property secured.

In addition to keeping your tenants safe and your property secured, a properly functioning door closer is typically required by building code. In the event of a fire, door closers help prevent the spread of the fire and smoke. Door closers also help regulate the temperature inside, saving you and your tenants on heating and cooling costs. We offer a full range of door closers to outfit your property.

ADA compliant door closers ensure accessibility for persons with disabilities.

Variety of closer sizes available & adjustable sizing on select models. Find the right closer for the right application.

Heavy duty closers are UL/ 3 hour fire rated to meet building code requirements for fire and smoke.

Closers can be used on internal or external doors and either standard, top jamb and/or parallel mounted.

10 Year limited warranty on commercial door closers.
